ATARI LOADING INSTRUCTIONS

Hold down START and OPTION and swit
ON computer then press PLAY on tape recorder.

SIDEWINDER

You are the only survivor of a team of agents sent underground to capture the latest development in helicopter technology . . . SIDEWINDER. The rest of your team have been captured by enemy personnel. Your mission is to fly Sidewinder to safety at the surface.

SIDEWINDER

JOYSTICK only

Any key Pauses and Unpauses

One of the prices to pay for high technology is high fuel consuption. As Sidewinder runs low on fuel you will hear an audible warning alarm (a bleeping sound). To refuel Sidewinder you must shoot the fuel pods which are found scattered in various places throughout the caverns.

To advance to the next level, land on the landing pad at the beginning where an automatic lift takes you up to the next level. On the surface your president is waiting to greet you with a hero's welcome.

GOOD LUCK.
